25 for \$2.20

Collection 4
10 Bulbs each of all ten Blue Ribbon varieties
100 for \$8.15

All varieties are separately packed and labeled.

WHERE TO PLANT

A cheery note of "welcome" greets the visitor to this home with Tulips grouped along the garden path.

The bright and gay, long-stemmed Tulips show up splendidly against a backdrop of evergreens.

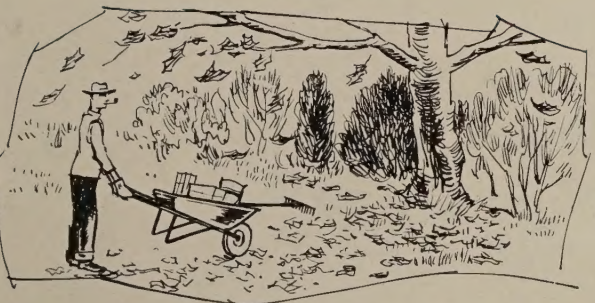

A naturalistic and informal setting is provided by Tulip plantings in the rock garden.

Do not remove Tulip foliage until it has died down completely. You can provide for additional annual flowers after Tulips have bloomed by planting seedlings between the plants.

WHEN TO PLANT

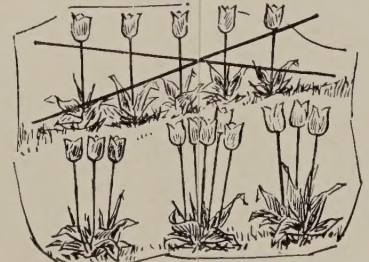

Autumn leaves announce the arrival of planting time for Holland bulbs. They can be planted until the ground is frozen. Spring planting is not successful.

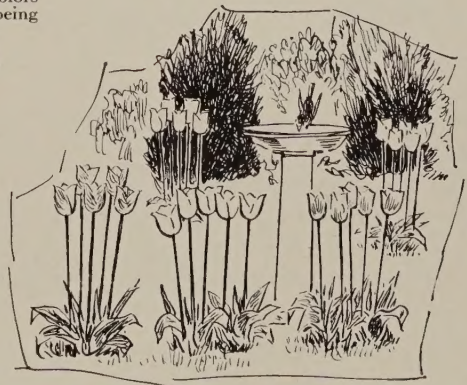

HOW TO PLANT

The practical method to plant Tulips. A hole is dug to about 6 inches deep. Set the bulbs in it, spaced 4 to 5 inches apart, and replace the soil.

Group planting is more effective than planting in single rows. Use only one color to each group.

The bird bath, as well as other garden ornaments, makes an excellent setting for group plantings of Tulips.

Hyacinths

Soon after the last traces of snow disappear, it is amazing to see these Hyacinths make their bold appearance and burst into bloom. You will be astonished and delighted with the enormous flower spikes Hyacinths produce. Small groups planted here and there in the garden will reward you immeasurably with their exquisite colors and heavenly fragrance. Hyacinths and Daffodils, blooming at the same time, make excellent companions.

Daffodils

Is there a sight more welcome than the golden Daffodils dancing and nodding in the pale April sunshine? The joy of beholding them brightening the awakening garden is renewed daily during their entire glorious blooming season. Left undisturbed in your garden, they will return each spring with an increasing number of flowers.

10 for 35c; **25 for 85c** 100 for \$3.00

Mixture of "HERALDS OF SPRING"
25 for 65c; **100 for \$2.25**

QUESTIONS and ANSWERS

Holland-grown bulbs are the finest obtainable because they are produced by the world's foremost growers who have generations of experience behind them. Grown and packaged in Holland, they assure you of healthy, top-quality bulbs.

A formal setting for Hyacinths

● **Are Holland Bulbs Difficult to Grow?**

No. Under normal conditions Holland bulbs will produce well-developed flowers because the flower buds are already formed inside the bulbs when you receive them.

● **Do They Require Any Special Attention?**

No. Once planted, the bulbs take care of themselves. No weeding—no spraying for insects!

● **Where Can I Plant Them?**

Anywhere, in either sun or partial shade.

● **What Kind of Soil Do They Need?**

No special kind. Any garden soil will grow them.

● **Is Fertilizer Necessary?**

Chemical fertilizers are not advised. An application of an organic fertilizer such as manure or bone-meal is helpful.

A wealth of Daffodils from one clump

Heralds of spring tucked in nooks and corners

● **How Many Bulbs Will I Need?**

Tulips require 5 to 8 bulbs per square foot, Daffodils 4 to 5 bulbs, Hyacinths 3 to 4 bulbs, and the Heralds of Spring about 12 bulbs.

● **Do Bulbs Need Protection During the Winter?**

No, they are hardy. If you live in a climate where the ground alternately freezes and thaws, cover the ground with a light mulch.

● **Should I Cut Off the Green Foliage After the Blooms are Gone?**

No, let it die down naturally. The green foliage is necessary for the development of the new bulb.

● **How Long Can I Leave Them in the Ground?**

Indefinitely. For better flowering results, replant Tulips and Hyacinths after 3 years.
